

Jssst

Started in 2009 with producing on a serious level, Joost Haitink aka Jssst released his first tracks in 2011. This doesn't mean he wasn't involved with music before! Actually he has always been a music lover and has especially a passion for Electronic Music. At the age of fourteen he became obsessed with it. He bought some turn tables and started mixing. Due to the fact that he couldn't express himself at that point of time, he started to learn to play the guitar. Besides that he's also able to play the piano. And that's pretty handy if it comes to producing. In 2012 he started to DJ in clubs in The Netherlands, but mainly in Amsterdam. Jssst has grown the last years and is also the owner of Jssst Records and Experimentalist. Two labels where passion for music is preferred above money. Keep an eye on him, because you can't ignore him. There will a come a time in your life that you will meet him again.
